Summary

Software engineering student with hands-on experience building projects that demonstrate problem-solving and technical skills. Eager to contribute fresh perspectives and a strong work ethic to your team—let's discuss how I can add value to your organization.

Education

Technion - Israel Institute of Technology   Expected Graduation June - 2026
Software Practical Engineering   Cumulative GPA 3.9 / 4.0

Projects

Forecastly

- Built a weather dashboard using Vue.js and TypeScript to display real-time weather data, featuring geolocation and city search for user convenience.
- Designed a responsive and user-friendly interface, ensuring seamless navigation and accessibility across devices.

BlogFlow

- Designed and developed a personal blog platform using Vue.js, featuring a clean and responsive interface for showcasing my projects and technical insights.
- Implemented category-based filtering and a dynamic search feature to organize and highlight content, making it easier for visitors to explore my work.

Notionary

- Developed a full-stack note-taking app using React, Express.js, and MongoDB, allowing users to create, edit, and delete notes securely.
- Implemented user authentication to protect personal notes, ensuring privacy and security for all users.

Technical Skills

- ❖ Programming Languages: Java, JavaScript, TypeScript, C#, Python
- ❖ Front-End Development: Vue.js, React.js
- ❖ Back-End Development: Node.js, Express.js
- ❖ Databases: MySQL, PostgreSQL, MongoDB
- ❖ QA Automation:Unit Testing MSTests Framework
